

WHERE AVIATION SECURITY, INTELLIGENCE & INNOVATION UNITE

Johnson Controls invites you to the European Aviation Security Conference

 14-16 April 2026

 Galgorm Resort & Spa, Northern Ireland

We are delighted to invite you to the Johnson Controls European Aviation Security Conference 2026, hosted at the 5-star Galgorm Resort & Spa and the Johnson Controls R&D Centre of Excellence office in Belfast, Northern Ireland.

This exclusive gathering of aviation leaders from the UK and Europe will explore the future of airport security and operational intelligence, showcasing how integrated access control, video, radar, biometrics, and AI-driven analytics are transforming airport operations.

Connect directly with the Johnson Controls experts behind the technology, collaborate with peers, and help shape the next era of aviation security.

Register your interest by **30th January** to secure your place.
For further information, please contact edwina.weiniger-ext@jci.com.

AGENDA AT A GLANCE

AC2000 airport access control roadmap

Upcoming hardware and software updates, including intelligent readers, biometrics, and smart card technologies.

Enterprise video & AI innovations

AI-powered video and analytics for proactive security and operational insight.

Voice of the customer & AI roundtables

Collaborative sessions shaping future aviation solutions and more autonomous airport operations.

Live demos & expert insights

Airport case studies, best practices, and interactive expert panels.

Unified security management

The benefits of integrating systems, processes, and data across the airport.
